Profile summary

Final-year B.Tech Computer Science Engineering student with strong Java, Data Structures, OOP, and DBMS fundamentals, experienced in building full-stack MERN applications and REST APIs. Hands-on exposure to MongoDB/MySQL, cloud deployments (Render, Vercel), Git-based development, and basic Agile practices with end-to-end debugging across frontend and backend. Interested in AWS, AI/ML, and data-driven applications, with experience creating analytics dashboards and exploring GenAI-powered data analytics.

Education

Bachelor of Technology in [CSE]
Aug 2022 – May 2026 | **CGPA : 8.42**
Dayananda Sagar University, Harohalli

PUC [Science Stream]
June 2020 – Mar 2022 | **Score : 90%**
Mandara Residential PU College, Harihara, Davanagere

Schooling (Grades 1–10)
June 2008 – Mar 2020 | **Score : 93.76**
Sri Basava International School, Davanagere

Projects

Doctor Appointment Web Application Github **MongoDB , Express.js , React ,Node.js ,REST APIs**

- Implemented REST APIs for user registration, login, doctor/patient management, and appointment booking.
- Debugged issues across frontend and backend during development, improving reliability and user experience.
- Used Git and GitHub with feature branches and pull requests to manage code changes.

Library Management Web Application Link **MongoDB ,Express.js ,React ,Node.js , REST APIs**

- Developed a web application to manage books, students, and issue/return workflows using MERN stack.
- Designed CRUD APIs for books and users, and implemented search/filter features for faster access.
- Deployed the application using Render for Backend and vercel for Frontend.

Power BI Dashboard – TCS Stock Market Github

- Created an interactive Power BI dashboard to analyze TCS stock prices and trends over time.

Skills

Programming Language: Java, C, JavaScript, HTML, CSS, Basic Python

Libraries & Frameworks: React.js, Node.js, Express.js, Bootstrap, REST APIs

Tools & Platforms: GitHub, Postman, VS code

Databases: MySQL, MongoDB,SQL queries

Core CS & Concepts: Data structure, Computer networks, OS, DBMS, OOP, SDLC, Agile practices

Cloud & DevOps (Basic): Experience deploying full-stack applications on cloud platforms (Render/Vercel); learning AWS, containers, and CI/CD concepts.

Certifications

Database Management Systems - NPTEL Certificate

GenAI Powered Data Analytics - Certificate

Achievements

"Earned 100 days LeetCode badge for consistent problem-solving activity in data structures "
